## Penetrator for Monorail

**Model: SB093**

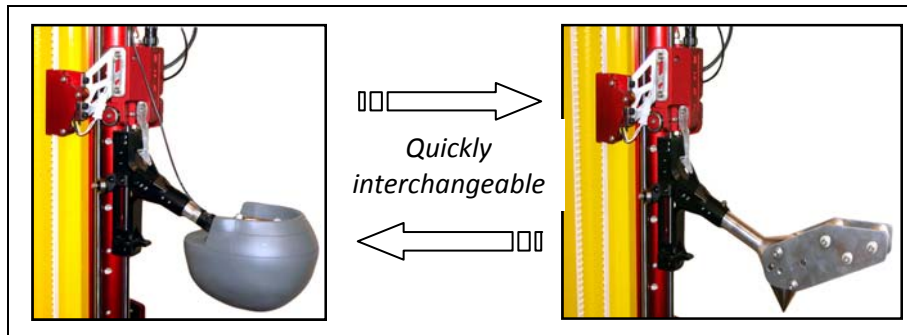

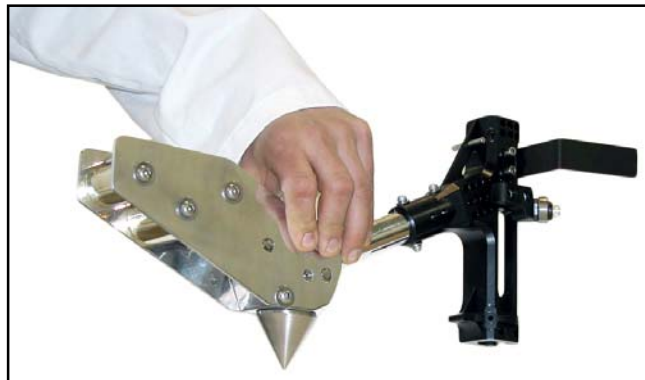

The penetrator device is designed to fit Cadex equipment. The center of gravity is aligned with the penetrator tip's axis. The mass requirement is met when combined with the falling carriage.

### Features :

- Quick and easy to be mounted on the monorail carriage;
- Center of gravity aligned with the penetrator tip axis;
- Comes with a spare penetration tip;
- Comes with a certificate of conformity.

*Center of gravity aligned with the penetrator tip when installed on Cadex carriage.*

*Test technicians simply have to interchange the headforms with the penetrator device in order to prepare the penetration test.*

*Penetrator device shown installed on a monorail.*
