

# Impact Accessories

## Split Ring Clamp

Model : 240\_00\_CLAM

The **Clamp** is used to lock the head form in a particular position and hold it there during the impact test. The clamp's weight is customized to your testing setup to help you reach the required total mass assembly requested by certain standards.

### Features :

- The weight can be customized from 180 grams up to 1200 grams ( ± 5 grams);
- Material: Magnesium, aluminum and brass alloy

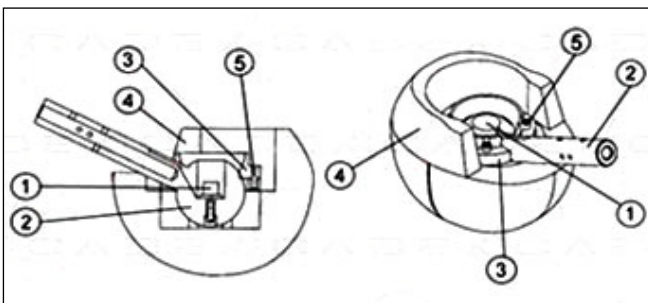

## Ball Arm

Model : 230\_01\_BA

The **Ball Arm** contains the accelerometer and allows the headform to rotate.

### Features :

- Available in Magnesium, Aluminum and steel;
- Coming in 20°, 25°, 30° or 35° angles;

- Inside view :**
- (1) Accelerometer kit
  - (2) Ball Arm
  - (3) Clamp
  - (4) Headform
  - (5) Bolts

Ball Arm assembled with Split Ring Clamp.
