

Conditioning

Radiant Heat Chamber

Model : SB094

Designed and manufactured to meet EN 443 and/or NFPA 1971 standard. Using touch screen controller technology along with an alarm, the radiant heat chamber manages automatically all of the different conditioning steps.

Features :

- Full automatic system;
- Touch screen controller technology;
- Radiant panel with auto self-adjustment power system;
- Radiometer and thermocouple adjustable in height;
- Doors can be opened or closed to perform either NFPA 1971 or EN443 conditioning procedure.

Touch screen controller technology.

Radiometer and thermocouple, adjustable in height

Doors can be 'closed' to perform NFPA 1971 conditioning procedure or, 'opened' to perform EN443.
