Load Cell Assembly
Model: 430_00_LCEL

Allows to calculate the pressure at the time of an impact. For load distribution testing. Complies with ANSI Z89.1 and EN 397.

Features:
- Combination of three load cells (equally distanced) to avoid any lost of reading;
- Compatible with the Cadex software;
- Headform not included.

Shown installed on impact monorail with Impactor.
Mountaineer’s Headform installed on Load Cell Assembly.
Inside view: Assembly of three load cells equally distanced for better accuracy.
