

Headform

Chinese headforms

Model: SB146 (Size 1)

Model: SB147 (Size 2)

These headform are used to perform force transmission and resistance to penetration on hard hats (according to GB 2811 requirement).

The headform is designed to be mounted on a loadcell assembly. The headform's geometry and mass meet the requirements of the chinese standard. Same design of headform is also used to perform penetration procedure.

Features :

- Materiel: Aluminium;
- Technical data sheet included;
- CNC machined;
- Complies GB2811 geometry and mass requirements;
- Two sizes available (Size 1, Size 2).

Shown performing shock absorption testing procedure.

Shown performing resistance to penetration testing procedure.
