

Impact Accessories

Anvils

Model : SB_ANVIL

All types of anvils are available according to all existing standards. The Quick release system (Exclusive Cadex feature) allows test technicians to quickly interchange impact setups.

Features :

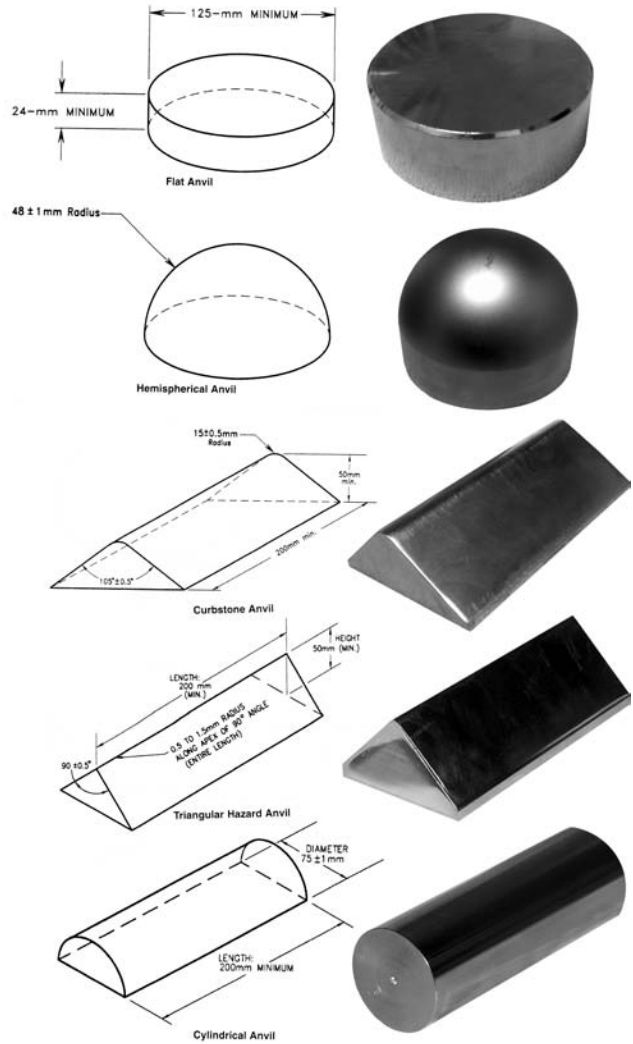

- Each anvil comes with compliancy certificate;
- Each anvil comes with Quick release female part;
- Available in stainless steel or steel plated with nickel to prevent corrosion;
- Male part and clamp are sold separately;
- 360° positioning of the anvils.

Shown during an helmet impact test.

Male and female quick release example.

Anvils for all existing standards are available.

Exclusive quick release system reduces set up time.
