Impact Machine

Mini twin wire impact machine

Model : SB069

Ideal for testing labs with the limitation of a low ceiling height. The modular base design allows users to attach different accessories to perform multiple applications. Can be bolted to massive concrete block below floor level, to comply with base mass requirement.

Features :

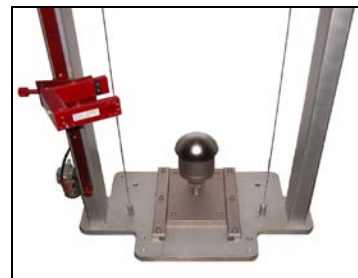

- Ideal for low ceiling height applications;
- Different testing applications can be attached to the modular base;
- Motorized system;
- Low profile falling carriage;
- Electro-pneumatic release system.

Applications :

- Low energy impact attenuation applications;
- Australian load cell applications;
- Low energy force distribution applications;
- Customized testing applications.

Falling carriage Close up

*Left: Base allows the user to attach different testing modules.
