Projection and Surface Friction (Method B).
Model : SB053

Projection and surface friction (Method B) testing machine designed according to ECE22.05 standard. This machine perform both; friction test and shear test.

Features :
- Pneumatic system to apply force;
- Sliding adjustable table;
- Guided drop loading mass;
- Soft stopping bumper;
- Pressure gauge;
- Interchangeable abrasive surface;
- Load cell with electronic display;
- Touch screen controller technology.
- Integrated time gate to verify the apparatus.

Adjustable helmet distance.

Adjustable helmet height.

Adjustable headform angle.

Touch screen controller technology & micro-adjust pressure gauge.
